

My app was finished.

It still couldn't go live on Android for weeks.

What nobody tells business owners before they pay for an app

**Google required
12 real testers for
14 days in a row.**

**117 signed up.
Only 12 installed it.**

ASK WHOEVER BUILDS IT

1. When does testing start?

Weeks before launch, while the app is still being built, so testers catch bugs before your customers do.

ASK WHOEVER BUILDS IT

2. Who are the testers?

Your customers and staff. Online, skip random tester groups. Find people who have the problem your app solves.

ASK WHOEVER BUILDS IT

3. Who takes care of it after launch?

Phones update, rules change, bugs show up. Know who fixes it and what it costs.

**Pick a launch date,
then work backward.**
